

**PARTICIPATE
IN THE ENERGY
TRANSFORMATION
OF CUBA AND THE
CARIBBEAN**

Supported by:

Organised by:

The objectives

- 1.** To promote the bioelectric programme
- 2.** To promote cooperation between the European Union and Cuba and the Caribbean
- 3.** The creation and development of the university network of Cuba in the Caribbean
- 4.** To support the development of the Cuban solar thermal energy programme

Our future

The objective of the Cuban government is to increase the mix of renewable energy sources in the generation of electricity from 7 % to 37 % by 2030.

BIOMASS/BIOGAS

Install 612 MW in 17 bioelectric farm by 2030.

WIND POWER

Install 807 MW in 13 Wind Farms.

SOLAR POWER

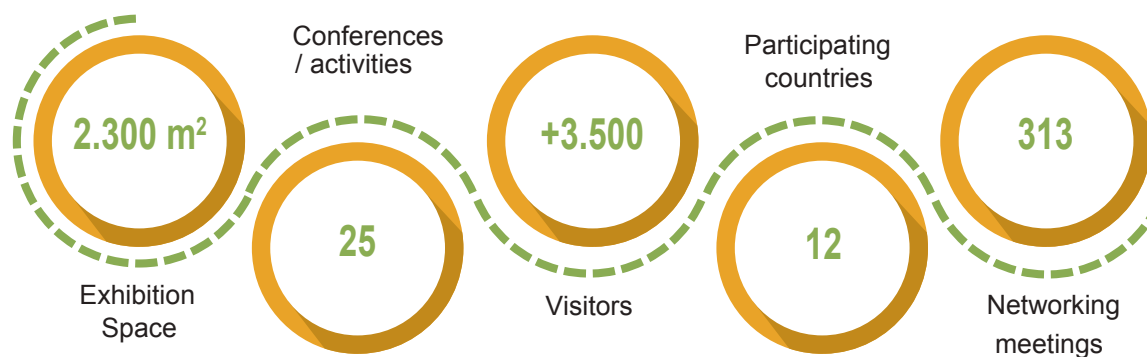

Install 2104 MW in Solar Power plants by 2030.

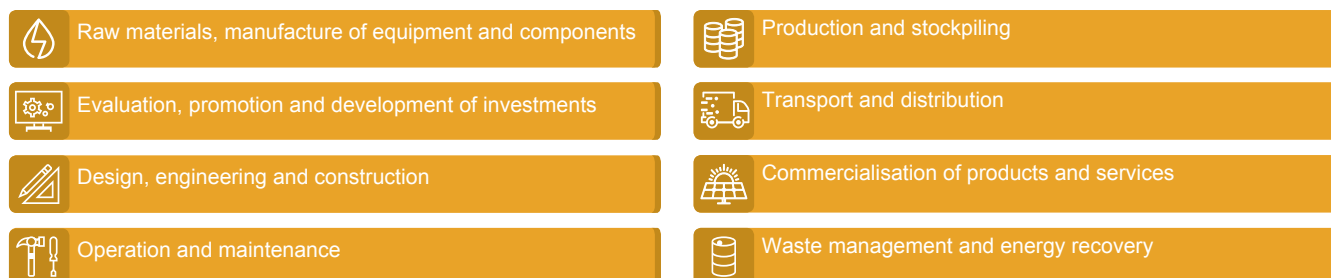

HYDROELECTRIC

Construction of 74 small hydropower stations with more than 56MW.

Key figures from 2018
